INDEX TO VOLUME 82

"Starred items are Shorter Notes"

Abi-Khuzam, Faruk F. *The order of entire functions with radially distributed zeros*, 71.

Al-Amiri, Hassoon and Mocanu, Petru T. *Spirallike nonanalytic functions*, 61.

Alspach, Dale E. *A fixed point free nonexpansive map*, 423.

Atalla, Robert E. *Markov operators and quasi-stonian spaces*, 613.

Babu, A. C. See Maiti, M.

Barth, Karl F. and Clunie, James G. *Level curves of functions of bounded characteristic*, 553.

Beck, Anatole. *A pathological flow in the torus*, 303.

Bindschadler, David and Nishiura, Togo. *The Goffman-Liu area and Plateau's problem*, 66.

Bland, Paul and Riley, Stephen. *Density relative to a torsion theory*, 527.

Blass, Andreas. *A partition theorem for perfect sets*, 271.

Block, Louis. *Periods of periodic points of maps of the circle which have a fixed point*, 481.

Bose, Ramendra Krishna and Mukherjee, Rathindra Nath. *Approximating fixed points of some mappings*, 603.

Boyaraky, Abraham and Haddad, Gabriel. *A result related to a theorem by Planigiani*, 538.

Breen, Marilyn. *Admissible kernels for starshaped sets*, 622.

Brooks, Robert. *Exponential growth and the spectrum of the Laplacian*, 473.

Bruner, Robert R. *An infinite family in $\pi_* S^0$ derived from Mahowald's η_j family*, 637.

*Bula, W., Dębski, W. and Kulpa, W. *A short proof that a compact ordered space cannot be mapped onto a nonmetric product*, 312.

Calderon, Calixto P. *On the Dini test and divergence of Fourier series*, 382.

Chandler, Eric. *Fixed points and boundaries*, 398.

Chatterjee, A. and Dikshit, H. P. *Convergence of a class of cubic interpolatory splines*, 411.

Christensen, Jens Peter Reus. *Joint continuity of separately continuous functions*, 455.

*Clay, Jesse P. and Joseph, James E. *A characterization of C-compact spaces*, 657.

Clunie, James G. See Barth, Karl F.

Colby, R. R. and Fuller, K. R. *Exactness of the double dual*, 521.

Colton, David. *Schwarz reflection principles for solutions of parabolic equations*, 87.

Cortzen, B., Small, L. W. and Stafford, J. T. *Decomposing overrings*, 28.

Cross, G. E. *Some conditions for n-convex functions*, 587.

Czubiak, Thomas P. and Gundersen, Gary G. *Entire functions that share real zeros and real ones*, 393.

Dadok, Jiri and Taylor, Michael. *Local solvability of constant coefficient partial differential equations as a small divisor problem*, 58.

Davidson, Kenneth R. *A proof of the boundary theorem*, 48.

Day, Mahlon M. *Comments on notes of Stanojević et al.*, 105.

Dębski, W. See Bula, W.

*Dierolf, Susanne. *The Fréchet space ω admits a strictly stronger separable and quasicomplete locally convex topology*, 655.

Dikshit, G. D. and Rees, C. S. *Absolute Riesz summability of Fourier series. I*, 231.

Dikshit, H. P. See Chatterjee, A.

Doran, R. S. and Tiller, Wayne. *Extensions of pure positive functionals on Banach *-algebras*, 583.

Doss, Raouf. *Elementary proof of the Rudin-Carleson and the F. and M. Riesz Theorems*, 599.

Drasin, David, Guanghou, Zhang, Lo, Yang and Weitsman, Allen. *Deficient values of entire functions and their derivatives*, 607.

Edelman, Paul H. *The Bruhat order of the symmetric group is lexicographically shellable*, 355.

Edmonds, Allan L. *Orientability of fixed point sets*, 120.

Fabian, Marián. *Differentiability via one-sided directional derivatives*, 495.

Ford, T. J. *Every finite abelian group is the Brauer group of a ring*, 315.

Frankl, Peter. *Regularity conditions and intersecting hypergraphs*, 309.

Fried, David. *Nontoral pinched Anosov maps*, 462.

Frohardt, Daniel. *From a 3-local plus 3-fusion to the centralizer of an involution*, 330.

Frolík, Zdeněk and Holický, Petr. *Decomposibility of completely Suslin-additive families*, 359.

Fuller, K. R. See Colby, R. R.

Garner, Lynn E. *On the Collatz $3n + 1$ algorithm*, 19.

Geitz, Robert F. *Pettis integration*, 81.
Geluk, J. L. *Π-regular variation*, 565.
———. *An Abel-Tauber theorem for partitions*, 571.
Glicksberg, I. *Equivalence of certain representing measures*, 374.
Goffman, Casper, Liu, Fon-Che and Waterman, Daniel. *A remark on the spaces* $V^p_{\Lambda,\alpha}$, 366.
Goldman, William M. and Hirsch, Morris W. *Flat bundles with solvable holonomy*, 491.
Gregory, Thomas B. *A characterization of the contact Lie algebras*, 505.
Gripenberg, Gustaf. *A Tauberian problem for a Volterra integral operator*, 576.
Groemer, H. *On coverings of convex sets by translates of slabs*, 261.
Guanghou, Zhang. See Drasin, David.
Gundersen, Gary G. See Czubiak, Thomas P.
Haddad, Gabriel. See Boyarsky, Abraham.
Haghany, A. *Corrigenda to "Reflexive modules over certain differential polynomial rings,"* 314.
Haimo, Franklin and Tretkoff, Marvin. *Enlarging a free subgroup of a symmetric group freely*, 31.
*Hart, Klaas Pieter. *On the weight and pseudoweight of linearly ordered topological spaces*, 501.
Hatzenbuhler, James and Mattson, Don A. *Spaces for which all compact metric spaces are remainders*, 478.
Heerema, Nickolas. *Maximal separable intermediate fields of large codegree*, 351.
*Hensley, Douglas. *Concavity of powers of a convolution*, 503.
Herring, John R. and O'Sullivan, John J. *Lie groups which admit flat left invariant metrics*, 257.
Hill, Paul. *The third axiom of countability for abelian groups*, 347.
Hirsch, Morris W. See Goldman, William M.
Holický, Petr. See Frolík, Zdeněk.
Horadam, K. J. *The word problem and related results for graph product groups*, 157.
Hung, H. H. *On a theorem of Arhangel'skiĭ*, 629.
Hunter, Roger and Walker, Elbert. *S-groups revisited*, 13.
Hwang, Chii-Ruey. *A generalization of Laplace's method*, 446.
Hwang, J. S. *On a problem of Doob about the fine topology and normal functions*, 239.
———. *A problem on a geometric property of lemniscates*, 390.
Ioffe, A. D. *A new proof of the equivalence of the Hahn-Banach extension and the least upper bound properties*, 385.
Jajodia, Sushil. *Spaces dominated by two-complexes*, 288.
Jaworowski, Jan. *A continuous version of the Borsuk-Ulam theorem*, 112.
Johnson, Russell A. *A linear, almost periodic equation with an almost automorphic solution*, 199.
———. *Two-dimensional, almost periodic linear systems with proximal and recurrent behavior*, 417.
Joseph, James E. See Clay, Jesse P.
Karp, Leon. *On Stokes' theorem for noncompact manifolds*, 487.
Kaya, Arif and Satyanarayana, M. *Semirings satisfying properties of distributive type*, 341.
Kent, D. C. and Richardson, G. D. *Completely regular and ω-regular spaces*, 649.
Kiffe, T. *An abstract linear Volterra equation with a nonconvolution kernel*, 51.
Kirk, W. A. *An abstract fixed point theorem for nonexpansive mappings*, 640.
Korec, Ivan. *A ring with arithmetical congruence lattice not preserved by any Pixley function*, 23.
Kozlowski, George, van Mill, Jan and Walsh, John J. *AR-maps obtained from cell-like maps*, 299.
Kulpa, W. See Bula, W.
Landrock, Peter. *On centralizers of p-elements in indecomposable modules*, 325.
Lange, Ridgley. *Equivalent conditions for decomposable operators*, 401.
Lanski, Charles. *Solvable subgroups in prime rings*, 533.
Lawrence, John. *Boolean powers of groups*, 512.
Lax, R. F. *Multiples of Weierstrass points as special divisors*, 95.
Le Donne, Attilio. *On countably generated z-ideals of C(X) for first countable spaces*, 280.
Lestmann, Phillip. *Unibranched prime ideals and going down in PI rings*, 191.
Lewis, Wayne. *Homogeneous tree-like continua*, 470.
Lichtman, A. I. *The zero divisor problem for a class of torsion-free groups*, 188.
Liem, Vo Thanh. *An unknotting theorem in* Q^∞*-manifolds*, 125.
Lih, Ko-Wei and Wang, Edward T. H. *Monotonicity conjecture on permanents of doubly stochastic matrices*, 173.
Lipecki, Z. and Plachky, D. *On monogenic operators and measures*, 216.
Liu, Fon-Che. See Goffman, Casper.

Lo, Yang. See Drasin, David.
London, David. *A note on matrices with positive definite real part*, 322.
McMahon, D. and Wu, T. S. *Distal homomorphisms of nonmetric minimal flows*, 283.
Maass, Wolfgang. *A countable basis for Σ^1_2 sets and recursion theory on $\aleph_1$*, 267.
Mahowald, Mark and Ray, Nigel. *A note on the Thom isomorphism*, 307.
Maiti, M. and Babu, A. C. *On subsequential limit points of a sequence of iterates*, 377.
Marcus, Daniel A. *Minimal positive 2-spanning sets of vectors*, 165.
*Massey, William S. and Traldi, Lorenzo. *Links with free groups are trivial*, 155.
Máté, Attila. *Inequalities for derivatives of polynomials with restricted zeros*, 221.
Mattson, Don A. See Hatzenbuhler, James.
Menaldi, José-Luis. *The separation principle for impulse control problems*, 439.
Michael, E. *Inductively perfect maps and tri-quotient maps*, 115.
Mikami, Kentaro. *The existence of a coadjoint equivariant momentum mapping for a semidirect product*, 465.
Milnes, Paul. *On extending characters*, 196.
van Mill, Jan. See Kozlowski, George.
Mingarelli, Angelo B. *On a Stieltjes version of Gronwall's inequality*, 249.
———. *On a conjecture for oscillation of second order ordinary differential systems*, 593.
Mizokami, T. *On the dimension of cubic μ-spaces*, 291.
Mocanu, Petru T. See Al-Amiri, Hassoon.
Moh, T. T. *On a certain group structure for polynomials*, 183.
Mukherjee, Rathindra Nath. See Bose, Ramendra Krishna.
Mundici, Daniele. *Ergodic undefinability in set theory and recursion theory*, 107.
Murphy, Gerard J. *Continuity of the spectrum and spectral radius*, 619.
Neugebauer, C. J. *Some inequalities related to Hölder's inequality*, 560.
Nishikawa, Seiki. *On the existence of global solutions of the nonlinear parabolic equation of Eells-Sampson over product manifolds*, 369.
Nishiura, Togo and Rhee, Choon-Jai. *Cut points of X and the hyperspace of subcontinua $C(X)$*, 149.
Nishiura, Togo. See Bindschadler, David.
O'Sullivan, John J. See Herring, John R.
Pascaud, J.-L. *Two results on fixed rings*, 517.
Pigno, Louis and Smith, Brent. *On measures of analytic type*, 541.
Pixton, Dennis. *More counterexamples to Coleman's conjecture*, 145.
Plachky, D. See Lipecki, Z.
Platte, Erich. *Pure descent for the module of Zariski differentials*, 7.
Pol, Roman. *A weakly infinite-dimensional compactum which is not countable-dimensional*, 634.
Racher, Gerhard. *On the dual of a certain operator ideal*, 36.
Ratliff, L. J., Jr. *Note on asymptotic prime divisors, analytic spreads and the altitude formula*, 1.
Ray, Nigel. See Mahowald, Mark.
Rees, C. S. See Dikshit, G. D.
Rhee, Choon-Jai. See Nishiura, Togo.
Richardson, G. D. See Kent, D. C.
Riley, Stephen. See Bland, Paul.
Rival, I., Ruckelshausen, W. and Sands, B. *On the ubiquity of herringbones in finitely generated lattices*, 335.
Ruckelshausen, W. See Rival, I.
*Rudin, Walter. *Totally real Klein bottles in $\mathbf{C}^2$*, 653.
Sands, B. See Rival, I.
Satyanarayana, M. See Kaya, Arif.
Schiffman, Stephen J. *A mod p Whitehead theorem*, 139.
Schochet, Claude and Schreiber, Bertram. *Open centralizers and the continuity of group representations*, 99.
Schreiber, Bertram. See Schochet, Claude.
Sell, George R. *A remark on an example of R. A. Johnson*, 206.
Shintani, T. *A proof of the Burkholder theorem for martingale transforms*, 278.
Singh, Ram. See Singh, Sunder.
Singh, Sunder and Singh, Ram. *Subordination by univalent functions*, 39.

Small, L. W. See Cortzen, B.
Smith, Brent. See Pigno, Louis.
Smith, Robert A. *The L^2-norm of Maass wave functions*, 179.
Stafford, J. T. See Cortzen, B.
Stanojević, Časlav V. *Classes of L^1-convergence of Fourier and Fourier-Stieltjes series*, 209.
Sternfeld, Y. *Dimension of subsets of product spaces*, 452.
Styer, D. and Wright, D. J. *Results on bi-univalent functions*, 243.
Talagrand, Michel. *Some functions with a unique invariant mean*, 253.
Tan, Vo Van. *On the compactification of strongly pseudoconvex surfaces*, 407.
Taylor, Michael. See Dadok, Jiri.
Tiller, Wayne. See Doran, R. S.
Todorov, Pavel G. *Explicit formulas for the coefficients of Faber polynomials with respect to univalent functions of the class* Σ, 431.
Traldi, Lorenzo. See Massey, William S.
Travis, C. C. *Differentiability of weak solutions to an abstract inhomogeneous differential equation*, 425.
Trench, William F. *An oscillation condition for differential equations of arbitrary order*, 548.
Tretkoff, Marvin. See Haimo, Franklin.
Tsui, Sze-kai. *Central sequences associated with a state*, 76.
Walker, Elbert. See Hunter, Roger.
Walsh, John J. See Kozlowski, George.
Wang, Edward T. H. See Lih, Ko-Wei.
Waterman, Daniel. See Goffman, Casper.
Weitsman, Allen. See Drasin, David.
Wright, D. J. See Styer, D.
Wu, Pei Yuan. *C_{11} contractions are reflexive*, II, 226.
Wu, T. S. See McMahon, D.
Xin, Y. L. *Topology of certain submanifolds in the Euclidean sphere*, 643.
Zerling, David. (CA) *closures of analytic groups*, 133.
